**AMERIGEL POST-OP SURGICAL KIT INSTRUCTIONS**

AmeriGel Wound Dressing provides an antimicrobial barrier and maintains a moist wound environment which is necessary for proper wound healing.

**Directions:**

- Cleanse wound thoroughly with AmeriGel Wound wash and gently blot dry with gauze.
- Apply a small amount of AmeriGel Wound Dressing to the wound site.
- Apply 1 fabric bandage across the nail, wrapping around the tip of the toe (for ingrown toe nail procedures).

**Contents of Amerigel Post Op Kit:**

- One tub AmeriGel Wound Dressing
- One bottle AmeriGel Wound Wash
- 30 (2X2 in.) gauze pads
- 30 (1X3 in.) fabric bandages.

**Gel Toe Cap:**

- If your AmeriGel Post Op Kit included a Gel Toe cap, wear toe cap whenever foot is submerged in water (shower, pool, beach, etc.) and/or when you are wearing closed toed shoes.
- If you have tenderness with closed toe shoes, wear toe cap at all times.

**Post Op:**

It is common to have yellow, red, or clear seepage from the wound site. If you experience yellow seepage, there is no need to call the office. If you experience white seepage (puss) please call HFAA at (309) 661-9975 to schedule an appointment. You may also experience tenderness the first few days and when wearing closed toe shoes.

Please contact our office if you have any questions at 309-661-9975.
